
Instructions for taking the test

1. Please visit: <https://www.qbcheck.com/>
2. Find red button on the left labelled "For users with vouchers" and click "start test".
3. Your access voucher code will be sent to you separately.
4. Please make sure you perform the test in a well-lit room, with no distractions.
5. Sit comfortably during the computer check and angle the computer screen to fit your head within the blue lines, rather than leaning forward.
6. The background behind you should be as bland as possible, preferably a light-coloured wall, blank and with sufficient lighting.
7. Your face needs to be illuminated evenly. If there is a window or light/lamp on one side, it could make one side of your face lighter, making it harder to detect.
8. If you have long hair, please put it in a ponytail so that the whole face is visible.
9. Headwear (hats, caps, scarfs etc.) and facial decorations (rings, piercings etc.) might cause issues.
10. Please complete the test during the day rather than at night.
11. Finally, please inform the office as soon as you have completed the test, as the software does not automatically inform us.
